

Kushal Choudhary

Dallas, TX | 214-899-0411 | kushalchoudhary3121@gmail.com | linkedin.com/in/kushal-choudhary

EDUCATION

Master's in Computer Science, University of Texas at Dallas, USA

May '26 | GPA: 3.9

Bachelor's in Information Technology and Data Science, University of Pune, India

May '23 | GPA: 3.9

TECHNICAL SKILLS

Languages & Frameworks: Java, Python, JavaScript/TypeScript, C++, SQL/NoSQL, Node.js, React.js, SpringBoot, HTML/CSS, RestAPIs

Tools & Technologies: AWS (EC2, RDS, Lambda), Docker, Kubernetes, Kafka, Git, Jenkins, Jira, GraphQL, Linux, Redis, Figma

ML & Data Libraries: NumPy, Pandas, TensorFlow, PyTorch, XGBoost, Scikit-learn, LangChain, BERT, MLflow

WORK EXPERIENCE

Software Engineering Intern, Lumel Technologies

May '25 - Present

- Engineered backend logic to Cube's allocation engine, powering dynamic view creation from semantic models with persisted measure tracking; enabled real-time forecasting for 100K+ records across enterprise datasets in Microsoft Fabric and Power BI
- Delivered benchmark POCs for DuckLake, Delta Lake, and OneLake on 30M row datasets; accelerated platform decision by 40%
- Improved allocation runtime by 70% on 30M+ row workloads by rewriting SQL using CTEs & indexing for scalable performance
- Spearheaded resolution of API-level discrepancies between Cube's backend and frontend view logic, eliminating 30% of integration bugs, and integrated telemetry logging to enable usage-aware and consumption-based pricing

Software Developer, University of Texas at Dallas

Aug '24 - Apr '25

- Rebuilt the IEEE UTD website by integrating a React.js CMS with GraphQL, enabling real-time data updates for 500+ members
- Migrated the backend to a microservices-based Node.js and Express system, reducing response time by 30%
- Developed and deployed an NLP chatbot using Python and Dialogflow, automating 60% of member queries and event signups; ensured alignment with IEEE site workflows and user expectations
- Designed unified GraphQL schema across services, streamlining chatbot integration and reducing data-fetch errors by 40%

Software Engineer, Hewlett Packard (HP)

Jan '23 - Aug '24

- Built a client-facing analytics portal for HP Amplify with React.js, Redux Toolkit, and REST APIs in a Dockerized microservice setup; enabled 1.5K+ partners to visualize regional insights
- Implemented address auto-completion with Google Maps API and fuzzy matching, improving input accuracy across user forms.
- Architected & deployed Plantify, HP's sustainability platform, using Spring Boot & AWS CloudFront CDN for sub-600ms delivery
- Led UI/UX design as Team Lead, coordinating Agile sprints and driving reusable component delivery across cross-functional teams

Software Developer Intern, Ambitech Healthcare

Jul '21 - Dec '22

- Delivered a patient-facing healthcare platform using Angular, Spring Boot, and AWS Lambda; supported 10K+ users and 500+ daily requests with secure authentication using AWS Cognito, leveraging OAuth2.0 and JWT tokens with MFA support.
- Integrated Bluetooth glucometer sync & RazorPay payment APIs, enabled real-time readings & handling \$20K monthly transaction
- Designed a mobile-friendly interface with glucose level alerts and simplified workflows, increasing patient engagement by 40%

PROJECTS

Agentic AI Disaster-Relief Coordinator, University of Texas at Dallas

Jun '25 - Aug '25

- Built a multi-agent ML system (Planner, Logistics, Comms) ingesting FEMA/NOAA feeds & optimizing routes via OpenRouteService.
- Delivered real-time disaster updates and routing via cloud-hosted chatbot + dashboard, improving coordination speed by 95%.

Sentiment-Aware Product Review Summarizer using RAG Models, University of Texas at Dallas

Aug '24 - Oct '24

- Developed an ML platform with Streamlit & LangChain to generate sentiment-focused summaries of product reviews using RAG.
- Integrated Gemini API & BERT for advanced query handling, boosting review accuracy by 40% and aiding data-driven decisions.

ACTIVITIES

- Ranked in the top 5% among 500K+ participants in the Leetcode's international bi-monthly competitive programming contests.
- Mentored 110+ students as a Teaching Assistant at UT Dallas (2024-25), boosting DSA scores by 20% through weekly sessions.
- Secured 3rd place in La Trobe Innovation Challenge (2022) for designing a blockchain + IoT sustainability platform.
- Organized 15+ tech events and designed 10+ newsletters as IEEE Coordinator, boosting engagement among 300+ members.
